

LM-200 Pump Stand

Setting the Standard for On-Premise Laundry

The LM-200 pump stand is a reliable, durable and easy to use dispenser for on-premise laundry applications. It is intended to be used with an intelligent controller, a universal machine interface and an optional flush manifold.

System Advantages

Compatibility

The LM-200 maintains the Hydro Systems money-saving tradition of backwards compatibility with earlier designs. You may use your Orion laundry system, machine interfaces and controllers with the LM-200 system and vice versa. Everything is plug-and-play compatible.

Control Six Products

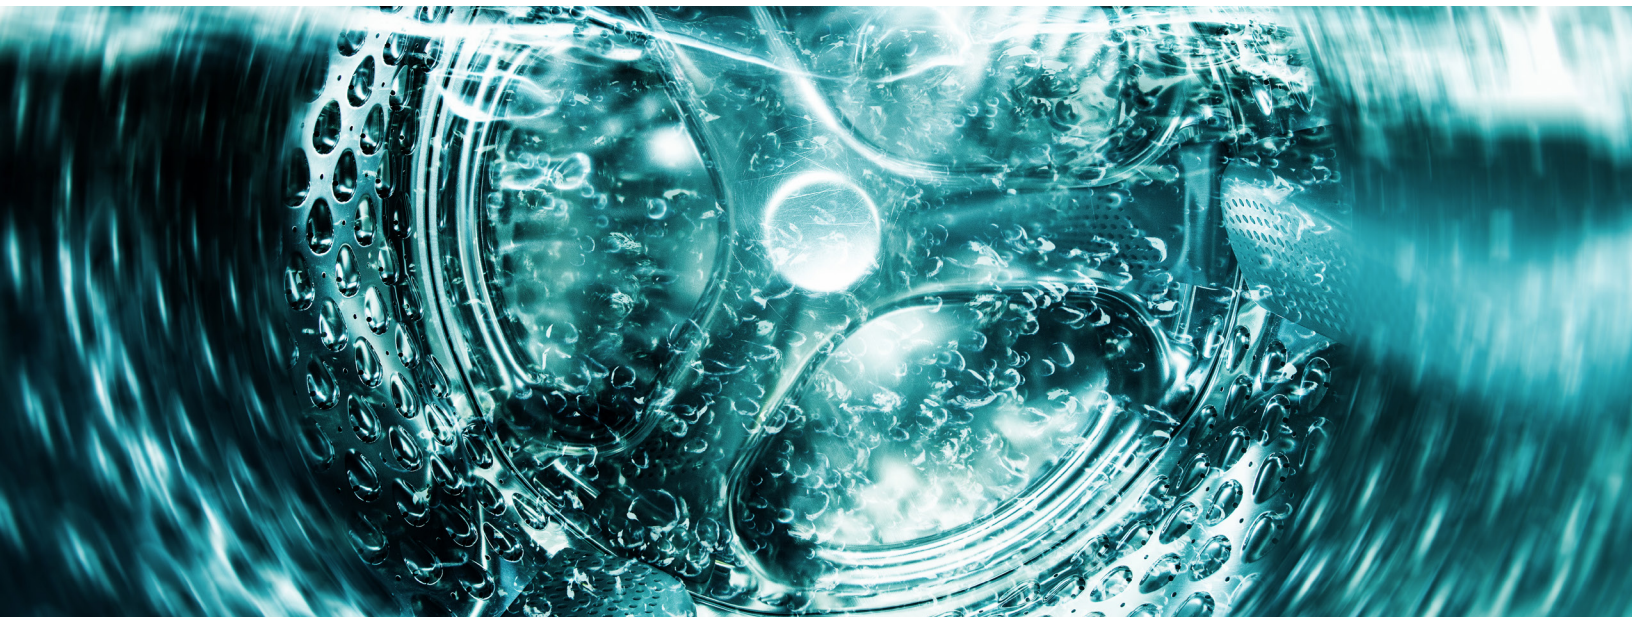

The LM-200 is available with up to six chemical pumps. This enables you to utilize all the chemical products that may be needed to satisfy the customer's situation.

Highly Accurate Pumps

The standard LM-200 pumps have a reference output of 12 oz./min.

Shown with Total Eclipse Controller and Machine Interface

System Advantages (Continued)

Safe Wiring

For your safety and convenience, all LM-200 pumpstands come pre-wired with an integrated flush output. In addition, the separate machine interface isolates the high voltage washer signals and provides a plugin output to the Eclipse or Total Eclipse Controller. Individual signal commons ensure maximum wiring versatility.

Easy Mounting

The LM-200 comes with an external mounting bracket and hardware, which makes installation simple and efficient.

Quick Pump Tube Change

The pump faceplates are held in place with finger-tightened, captive thumb screws. This makes changing pump tubes easy without requiring tools.

Controller Choices

Total Eclipse

The Total Eclipse Controller has 20 formula capacity and features Auto Formula Select. A - B - C chemical quantities for each of the 6 pumps available in each formula. The Total Eclipse is backwards compatible to the LM-100, LM-200, and LL-6000 pumpstands. Large LCD display features formula names, as well as trigger and pump diagnostics. Low voltage "plug-and-play" connections result in a quick installation. Download production and consumption reports, and upload formulas via USB memory stick.

Eclipse

The Eclipse Controller has a bright 3 digit LED display, and uses only 3 push buttons for programming. The Eclipse Controller has 8 formula, 6 pump capacity, plus AFC (Auto-Formula Select Mode). Load counts by formula and integrated flush logic are standard.

Security

All programming is protected by your own chosen passcode.

Model*	Description
LM-220	2 pump model
LM-230	3 pump model
LM-234	3 pump model in a 4 pump cabinet
LM-240	4 pump model
LM-245	4 pump model in a 5 pump cabinet
LM-250	5 pump model
LM-256	5 pump model in a 6 pump cabinet
LM-260	6 pump model

* When ordering, specify controller after pump module. Example: LM-240-xxx xxx=ECL Eclipse Controller or TE Total Eclipse Controller
