

SMP 2.0

Reliable Dilution Control for Multiple Products

SMP 2.0 offers a unique way to dispense a wide variety of automatically diluted solutions into spray bottles, buckets and other containers, while eliminating the possibility of chemical carryover between products.

Patented AccuPro® Pressure Regulation Technology eliminates dilution variance by controlling the amount of water permitted into the unit, never allowing it to “lean out” the desired dilution target.

- The patented dual flow cartridge assembly allows users to have one closed loop chemical for both high and low fill rates out of the same bottle
- Its venting system prevents chemical contact and eliminates product carryover
- The cam assembly provides simple, one-hand operation to engage and disengage the bottle – every time
- The system works with any number of chemical products – new products can be added at any time in the future

General Specifications

Model	Number of Eductors	
	Low	High
SMP 2000	1	1

Insert

Part No. 10090019

No chemical contact insert used with SMP 2.0 System.
