

# Seal-less Solutions for Chemical Applications

The new generation of **Mouvex**<sup>®</sup> **Eccentric Disc Pumps**, designed to provide premium performance and ultimate safety in chemical and industrial applications.

#### **Benefits:**

- Self-priming
- Seal-less Design
- Low Shear Rate
- Consistent Flow Rate
- Strong Suction and Discharge Pressure

### **Design:**

- Features and Benefits: Unique seal-less design features a double stainless steel bellows which ensures durability, safety and product containment. The SLC Series provides very high suction and discharge pressures which allows it to self-prime and fully strip lines, maximizing product recovery.
- The SLC can run dry for up to 5 minutes, and the self-compensating eccentric disc principle provides consistent flow rates over a long period of time. The flow rate is extremely accurate even at low speeds.
- There are fewer moving parts, which results in reduced maintenance and downtime.

## **Application:**

 Suitable for most chemical and industrial transfer applications, in particular those that require consistent nonpulsing flow and gentle fluid handling (low shear rates).

### Operation:

- **Principle:** Eccentric Disc, positive displacement
- Installation: Can be base mounted or cart mounted for mobility

## Description of Construction:

- All Stainless Steel construction
- Shaft sealed by double Stainless Steel bellows
- O-ring seals in FKM or coated FKM

## **Options:**

- Bellows Monitoring System (BMS)
- ISO PN 20 flanges / ANSI150 flanges
- ISO PN 16 flanges
- Heating Jacket
